SPECIFICATION FIRE TRUCK

ROSENBAUER INDUSTRIAL FIRE FIGHTING VEHICLE
MODEL ULF 2000/7500/1000

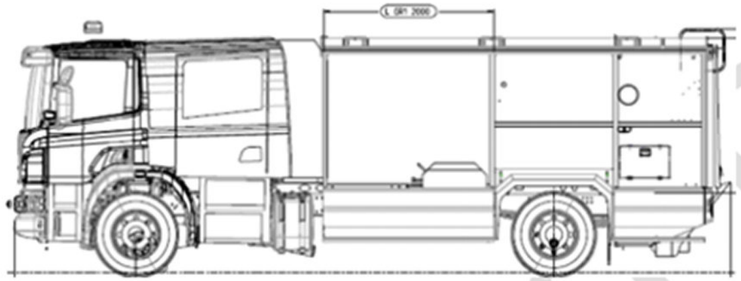

The Rosenbauer ULF 2000/7500/1000 HYDROMATIC is a specialized industrial tank fire fighting vehicle to offer effective protection in high fire risk areas, like tank farms, refineries, oil terminals, petrochemical plants, industrial sites, ports, commercial and trading areas.
The vehicle is capable of operating in desert terrain at high ambient temperatures and in a salt laden, highly humid climate. This vehicle has been engineered and will be fabricated and tested in accordance with the German (DIN), Austrian (ÖNORM) and internal Rosenbauer standards and specifications. All components of this vehicle are made of approved products, steadily improved and developed. This is the guarantee for absolute reliability and safety in performance.

Drawing will be updated with new design after signing the contract

MUNICIPAL FIRE FIGHTING / RESCUE VEHICLE

up to 20 tons

This illustration may contain special designs, that are only available at an extra charge!
We reserve all rights of reproduction for this illustration.

ET (Efficient Technology)

This specification describes a municipal ROSENBAUER fire-fighting or rescue vehicle with "Efficient Technology" (ET) of the latest generation.

We reserve the right to replace components that are no longer available with alternative products. However, we guarantee that the replaced parts will perform the same function, with the same or better quality.

We reserve the right to make general design changes in the interest of progress. All drawings and diagrams in this specification may contain special designs that are only available at an extra charge! We reserve all rights of reproduction for this description or illustration.
